Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2613

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by the United States Patent Application Publication 2002/0067407 (hereinafter referred to as "Cooper").

Cooper discloses a cable assembly (Cooper: figure 1, element 100) for a dental video camera system with a dental video camera (Cooper: figure 1, element 108) with a camera cable and a camera connector (Cooper: paragraph [0036]), a monitor with a monitor cable and a monitor connector (Cooper: paragraph [0050]) and a power supply with power supply cable and a power supply connector (Cooper: paragraph [0050], lines 9-12), a said cable assembly comprising: an input housing; a first connector disposed in said input housing whereby the camera cable electrically coupled to said first connector (Cooper: paragraph [0034]); a camera cable with a Complement Camera Connector whereby said the complement-camera connector electrically couples the dental video camera through the camera connector to said camera cable (Cooper: paragraph [0035]); an output housing with a complement-monitor connector (Cooper: paragraph [0039], a complement-power supply connector and a complement-first connector whereby said complement- monitor connector and said complement-power supply connector are disposed in said output housing and said complement camera connector electrically couples the dental video camera through the camera connector to the camera cable (Cooper: paragraph [0050], as in claim

1.

Regarding claims 2-3, Cooper discloses that the assembly comprises a circuit module; second connector disposed in said circuit module (Cooper: paragraph [0037]); a complement-second connector circuit module, and a frame grabber interface circuit disposed in said circuit module wherein said frame grabber interface circuit electrically couples the dental camera to the monitor (Cooper: paragraph [0050]), as in the claims.

Art Unit: 2613

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cooper discloses an electronic video dental camera. Holmes discloses a camera with improved focus mechanism. Mandelkern discloses a wireless dental camera.
